

Protecting Residential & Commerical  
Customers

SeftonArc's security solutions instil confidence, ensuring both safety and protection, offering bespoke CCTV and alarm systems with designs unique to your home or business. Friendly, qualified staff are on hand to install the systems with experienced engineers providing on call maintenance. Complete peace of mind is further guaranteed by the award winning and nationally accredited monitoring & response services.

## Our Services

---

### CCTV & Response

At SeftonArc we design and install high spec yet affordable CCTV systems that are the right answer for your business or home. Our control room provides 24-hour, 365 days a year monitoring – looking after thousands of cameras from parks and open spaces, hospitals and nursing homes, public space and town centre cameras to schools and private homes. Our operators have a direct link to the police and in case of an emergency, we're able to dispatch SIA trained guards to ensure a fast, immediate and controlled response to any arising situation until the emergency services arrive.

### Alarms & Response

We offer a wide range of high quality intruder and fire alarms to suit your budget and your premises, keeping your family, the general public and the workplace safe. Our systems are designed specifically for you and meet the requirements of all insurance companies. Our award winning Alarm Receiving Centre provides 24-hour, 365 days a year monitoring with direct links to the police. In the event of an incident, we are able to dispatch manned guards to secure the environment until police intervention.

“My team are ready to respond  
24 hours a day, 365 days a year”

Peter Finch, Head Engineer

---

## Lone Worker

Lone worker devices are an important tool in helping organisations reduce risks, improve efficiency and increase personal safety. At SeftonArc we offer a range of products that are fully monitored to ensure your workers are kept safe.

A discreet panic alarm is uniquely styled as an identity badge making it easy to wear and discreet to use. At the push of a button, SeftonArc's Alarm Receiving Centre can hear, assess and record whatever situation is developing, and decide on an appropriate response. A 'Roll Call' service is also offered for manned guards.

---

## Access Control

SeftonArc can provide superior levels of control over who has access to your building, enabling you to electronically restrict comings and goings. We can design a bespoke entry system that can accommodate the most demanding or simplistic access control requirements. Access Control provides increased personal security, but can also monitor timekeeping and attendance records, with the added benefit of interfacing with any building fire alarm system.
